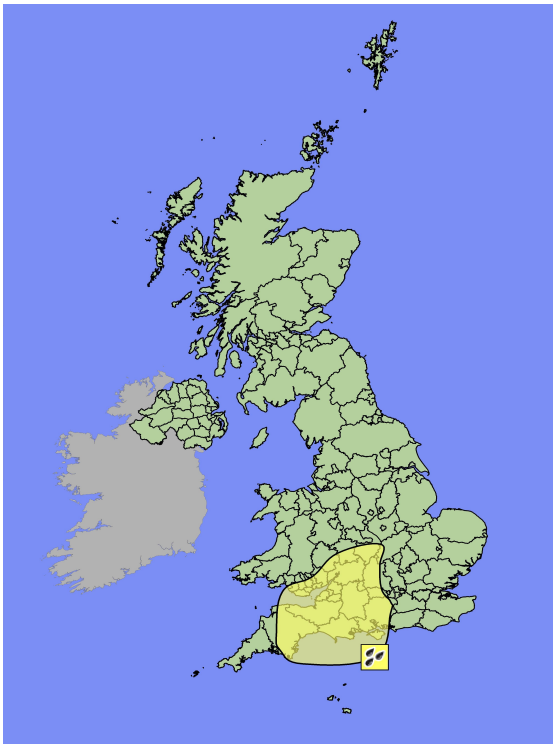
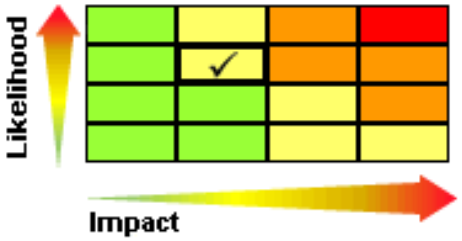
National Severe Weather Warning Service





Chief Forecasters Assessment
An active wave depression is expected to move northeast across the area early on Wednesday. Although there remains some uncertainty about the details of this development it is likely to bring 15-30 mm quite widely across the area with as much as 40 mm in places. As the ground remains saturated over much of the area following Tuesday's rain, localised flooding is a possibility.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:05 on Wed, 21st Nov 2012** until **12:00 on Wed, 21st Nov 2012**

Following Tuesday's rain, a spell of heavy and persistent rain is likely to cross parts of southern and southwest England along with the southwest Midlands and southeast Wales during the first half of Wednesday.

The public should be be aware of the possibility of localised flooding and possible disruption to transport.
